# 1 Introduction

Data provided by LSA include 17,254 French grocery stores. LSA provide three columns regarding the activity of stores over time: an opening date, a closing date and a re-opening date. Stores can thus be considered closed when they have a closing date but no reopening date. According to LSA data, beginning 2014, there were 15,086 hypermarkets, supermarkets, hard discount and "drive-through" stores operating in France.

## 2 Overview of store population by type

### 2.1 Surface by type

Descriptive statistics on surface by type show that grocery stores with a surface between 400 and 2500  $m^2$  are categorized as supermarkets, while those with a surface exceeding 2500  $m^2$  are categorized as hypermarkets. The type "Magasins Populaires" is attributed to stores with a significant surface dedicated to non food products (most of them belong to the same retail chain as will be shown later).

## 3 Stores and surface by group and chain

This section focuses on hypermarkets, supermarkets and hard discount stores (exclude?). "Drive-through" are thus left aside.

### 3.1 Stores and surface by group

The following table shows the number of hypermarkets, supermarkets and hard discount stores operated by the main grocery store groups in France.

## 3.2 Stores and surface by group and chain

Except for Aldi and Lidl, stores are subdivided in retail chains based on criteria such as the size or the location (city center, suburb, countryside etc.).

#### **4.4 Maps of groups' store locations**

For each group, on the first map, supermarkets are represented with green dots and hypermarkets with red dots. The second map accounts for the density of stores across France (stores' size is not taken into account).

## 5 Markets

Definition of market based on administrative limits.

### 5.1 Municipalities ("Communes")

There are 36,208 municipalities in Metropolitan France, with a total population of 62.5 million inhabitants (Census 2010). Only 4,864 municipalities have a grocery store (hard discount or supermarket with surface above  $400m^2$ ). This leaves 28.7% of the population living in municipalities devoid of grocery store.
